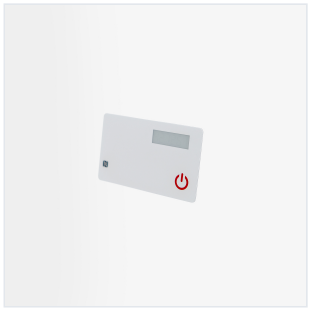
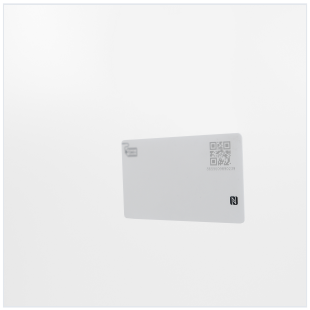
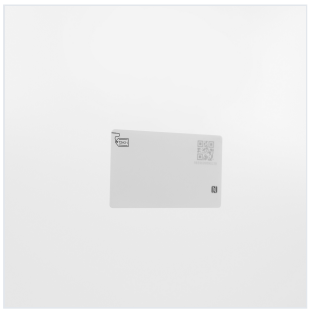
Token2 miniOTP-3-i programmable card with restricted time sync - nonbranded

Part no: MiniOTP3-i-NB · T2-58







Description

NFC programmable TOTP hardware token in a mini-card format than can be programmed using our burner apps available for Android, iPhone or Windows

A nonbranded version of miniOTP-3 token.

The seeds can be set and reset an unlimited number of times using Token2 NFC burner Android and Windows applications.

Note! Different from miniOTP-2 and OTPC-P1, with this token, setting time **will automatically clear the current seed** to eliminate the risk of replay attacks. Therefore this model is not recommended to be used with systems not supporting time drift, such as DUO

Specifications

Form-factor: mini card

Algorithm: TOTP

Time offset: 30 seconds

Number of digits: 6

Hash algorithm: sha1 (default) or sha256 (set using NFC burner)

Screen type: e-Ink

Screen size: 24 × 7 mm

Dimensions: 64 × 38 × 0.9 mm

Weight: 4 gr

Expected lifetime: 4-5 years

Programmable: Yes

Maximal seed length: 63 bytes (126 hex / 101 base32)

Time sync: Yes *[restricted: setting time will clear the seed]*
